BESCHREIBUNG

The goggles eye mask is made up of protective cover, foam strip, and fixing device made of macromolecule material. Goggles are used to block body fluids, blood splashes, or splashes.

The lens is transparent, with a smooth surface, free of scratches, cracks, ripples, bubbles, etc.

The surface of the goggle-eye mask shall be smooth without a blur or sharp angle.

The fixing device(/elastic belt) of the google eye cover shall be horizontally applied with 10N tension to keep the device(/elastic belt) from falling off the cover body.
